

DISCLAIMER

This Presentation (the Presentation) has been produced by Sun Finance Treasury Limited (the Issuer) solely for use in connection with the contemplated offering of the Notes (the Notes) and may not be reproduced or redistributed in whole or in part to any third party. The sole arranger for the Notes is Signet Bank AS (the Arranger).

This Presentation is for information purposes only. The Notes have their own particular terms and conditions that should be considered before making an investment decision. A prospective Investor should not make an investment decision relying solely upon this Presentation. By attending a meeting where this Presentation is presented or by reading the Presentation you agree to be bound by the following terms, conditions, and limitations.

No liability

The information in this Presentation has not been independently verified and can be subject to updating, completion, revision, and further amendment. The Issuer undertakes no obligation to update this Presentation or to correct any inaccuracies that may become apparent. The facts, information, opinions and estimates contained in this Presentation have been obtained from sources believed to be reliable and in good faith, but no representation or warranty, expressed or implied, is made as to their accuracy, completeness, and reliability.

This Presentation contains forward-looking statements that are based on current expectations and assumptions of the Issuer and involve known and unknown risks and uncertainties that could cause actual results, performance or events to differ materially from those expressed or implied in such statements. In addition to statements which are forward-looking by context, words such as "aims", "expects", "anticipates", "intends", "plans", "believes", "estimates", "assumes", "seeks", and similar expressions are intended to identify such forward-looking statements. Opinions and any other contents in this Presentation are provided for personal use and for tentative reference only.

No advice

This Presentation shall not be treated as legal, financial or tax advice of any kind. The investors shall conduct their own investigation as to the potential legal risks and tax consequences related to the issue and investment into the Notes. Nothing in this Presentation shall be construed as giving of investment advice by the Issuer or any other person.

Each potential investor must determine the suitability of the investment in light of its own circumstances. In particular, you should have: (i) sufficient knowledge and experience, access to and knowledge of appropriate analytical tools to meaningfully evaluate and fully understand this investment opportunity alongside with its advantages and risks, as well as the impact of this investment on your overall investment portfolio; (ii) sufficient financial resources and liquidity to bear all of the risks associated with this investment. If you are in any doubt as to whether to invest in the Notes, you should consult a qualified independent advisor.

General restrictions and distribution

This Presentation does not constitute an offer to sell or a solicitation of an offer to purchase any securities in any jurisdiction in which such offer or solicitation is not authorized or any person to whom it is unlawful to make such offer or solicitation. Each violation of such restrictions may constitute violation of applicable securities laws of such countries. Investors are required to inform themselves of any such restrictions and return this Presentation to the Issuer should such restrictions exist. By accepting this Presentation, the recipient represents and warrants that it is a person to whom this presentation may be delivered or distributed without a violation of the laws of any relevant jurisdiction. This Presentation is not to be disclosed to any other person or used for any other purpose and any other person who receives this Presentation should not rely or act upon it.

Conflict of interest

By presenting this material the Arranger has a conflict of interest situation as the Arranger can receive a fee for the placement of the Notes and have other business with the Issuer. The Arranger's Policy for Prevention of Conflicts of Interest is available on the arranger's website: https://www.signetbank.com/mifid/.

The Issuer or its Affiliates may, subject to applicable laws, purchase the Notes. It should be noted that under specific circumstances their interests may conflict with those of other Noteholders.

Target market

The target market assessment by the product manufacturer Signet Bank AS has led to the conclusion that: (i) the target market for the bonds is eligible counterparties, professional clients, and retail clients, each as defined in Directive 2014/65/EU (MIFID II); (ii) all channels for distribution of the Notes to eligible counterparties, professional clients and retail clients are appropriate. Any person subsequently offering, selling or recommending the Notes (a Distributor) should take into consideration the manufacturer's target market assessment, however, a Distributor subject to MIFID II is responsible for undertaking its own target market assessment in respect of the Notes (by either adopting or refining the manufacturer's target market assessment) and determining appropriate distribution channels.

SUN FINANCE AT A GLANCE: GROUP DEVELOPMENT OVER TIME

LOANS ISSUED (€M, CUMULATIVE)

SUN FINANCE AT A GLANCE: CAPITAL MARKETS TRACK RECORD

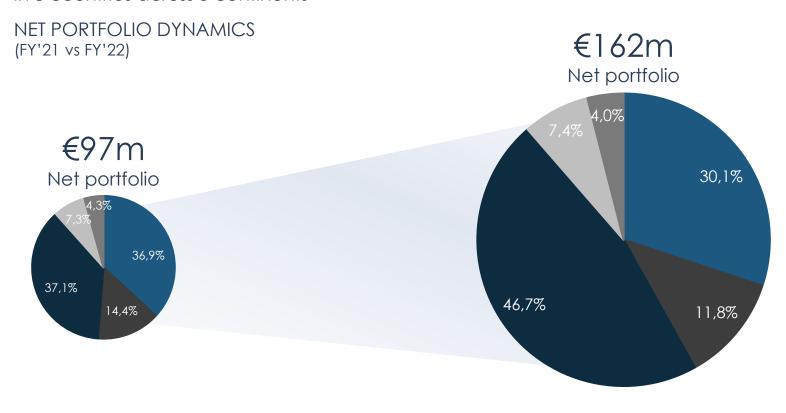

- Unsecured notes of 2020, 2021 and 2022 have been listed on Nasdaq First North market
- The 2019 and 2020 unsecured notes have been refinanced in 2021 and 2022, respectively
- The subordinated notes issued in 2021 have been redeemed at the maturity on Feb 28, 2023
- The maturity of unsecured notes issued in 2021 and 2022 is June 30, 2024, and September 30, 2025, respectively

DIVERSIFIED PORTFOLIO

Geographic diversification has always been one of the cornerstones of the Group's strategy – the Group has established presence in 8 countries across 3 continents

- Ongoing efforts by the Group management over time resulting in a well-diversified and geographically balanced portfolio across five hubs
- The Group is continuously reviewing potential new market entries to further increase its geographic footprint and expand its presence in current hubs
- Long-term target of the Group is to have 4 operational countries in each of the geographic hubs

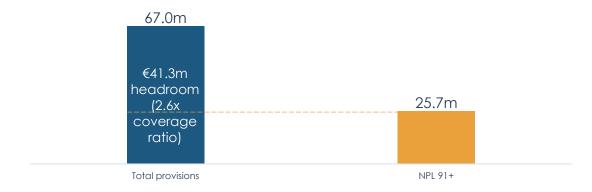

RISK MANAGEMENT AT THE FOREFRONT OF OPERATIONAL FOCUS

Pro-active risk management and a prudent provisioning approach has driven stable cost of risk levels and strong portfolio performance

NON-PERFORMING LOANS OF TOTAL LOANS ISSUED LTM (FY'22) (€m)

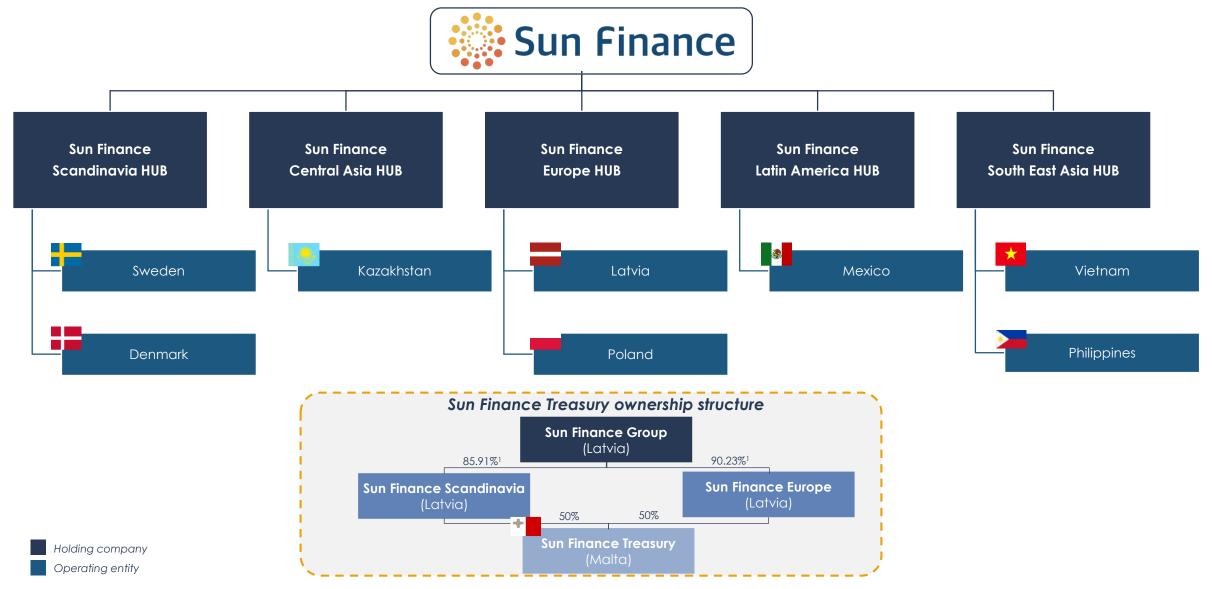

TOTAL PROVISIONS VS NPL (FY'22)

- Performing loan portfolio ("Not delayed", "1-30 days" and "31-90 days") accounts for 89% of gross loan portfolio
- Strong NPL management resulting in 3.7% of NPL's to issued loans over preceding 12 month period (NPLs defined as 91+ days overdue)
- Sun Finance manages provisioning in accordance with IFRS9 which relies on a forward looking methodology and utilises previously observed correlations
- The methodology utilised drives a NPL coverage (total provisions/gross NPL) ratio of 2.6x as of the end of FY'22

OPERATIONAL STRUCTURE OF THE GROUP

¹ Part of the remuneration package for senior management is stock options. These are shown fully vested in the diagram.

SEASONED MANAGEMENT TEAM SUPPORTED BY EXPERIENCED STRATEGIC INVESTORS

- *With the company since its inception, growing it from a start-up in 2017 to market leader in its operating markets
- In 2018 the Group attracted a reputable strategic investor providing both funding and strategic advice to accelerate growth
- A highly efficient and lean management organization setup in HUBs for each region, decentralizing most operational decision making
- The organizational setup has led to high-cost efficiency, capacity to simultaneously launch new products and expand geographically as well as offers flexibility in terms of day-to-day decision making and product adjustment

TOMS JURJEVS Founder & CEO

- Founder of Sun Finance
- Regional Director at 4finance
- Founder & Chairman of the Council at Alternative Financial Services
 Association Launched 2 successful businesses, growing them from a start-up to multimillion companies
- BSc Economics and Business Stockholm School of Economics Riga

LATKOVSKIS Co-Founder & COO

- Senior Consultant at EY

DANIEL STENBERG Scandinavia

- Overseeing Scandinavia regional hub
- Previously regional manager of Scandinavia, Baltics and Latin America as well as member of the executive committee at 4finance
- CEO & Chairman at 4spar AB
- CEO at Segus AB
- Wealth Manager at EELD Asset management

SUN FINANCE STRATEGY PLAYBOOK

Sun Finance's strategy is to leverage the company's existing operational capabilities and customer base by developing new products and solutions in existing markets as well as open new operational countries

STRATEGY SO FAR

CHALLENGE AND DISRUPT EXISTING ONLINE LENDERS IN SCANDINAVIA AND EUROPE

- ✓ High customer growth ✓ Solid portfolio dynamics
- ✓ EBITDA margin >39%
- Highly automated processes driving low cost/income ratio

OPEN MARKETS WHERE OPPORTUNITIES EXIST FOR FINANCIAL INCLUSION AND BUILDING CREDIT HISTORY TO DELIVER LOAN PORTFOLIO GROWTH

- Set up and develop profitable markets in Central and South East Asia
- Set up and develop profitable markets in Latin America

CONTINUOUSLY REFINE RISK MODELS AND GATHER SIGNIFICANT DATA TO DELIVER BEST IN CLASS CREDIT DECISIONING

- Develop best in class risks department with the best risk tools in the industry
- Build a material customer base for future leverage (currently >12.8m registered users and growing)

FUTURE STRATEGY PLAYBOOK

MAINTAIN SOLID GROWTH, CUSTOMER RETENTION AND PROFITABILITY ACROSS EXISTING MARKETS ENSURING STRONG CAPITALIZATION TO SUPPORT BUSINESS EXPANSION

CONTINUE GEOGRAPHIC EXPANSION BY ENTERING NEW MARKETS

LEVERAGE THE EXISTING CUSTOMER BASE AND PROPRIETARY DATA TO GROW NEW PRODUCT SEGMENTS TO ENABLE CUSTOMERS TO MOVE UP THE CREDIT LADDER

ENSURE STRONG LONG TERM EQUITY BASE DRIVEN BY HIGH AND **CONTINUOUS PROFITABILITY**

AGENDA

- 1. SUN FINANCE AT A GLANCE
- 2. BUSINESS OVERVIEW
- 3. FINANCIAL HIGHLIGHTS
- 4. TRANSACTION OVERVIEW

CUSTOMER PROFILE: A DIVERSE CUSTOMER BASE FOCUSED ON TECH-DRIVEN MILLENNIALS

Sun Finance has built a diverse tech-centric customer base with high retention rates, highlighting product fit and client satisfaction as well as provides significant opportunities for new product upselling and distribution within the existing base

CUSTOMER CHARACTERISTICS

19-35 years old customers (gen z and millennials) with active bank account

Has a valid phone number and ID

Employed and selfemployed with regular income

Speed,
convenience and
price are most
valued by
customers

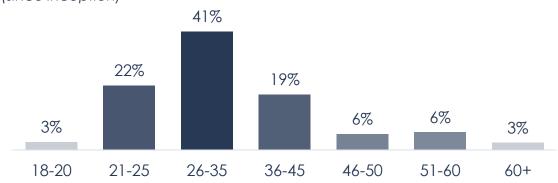

Has limited credit history

70% of the customers choose to use services repeatedly

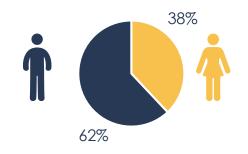

REGISTERED CUSTOMER AGE DYNAMICS (since inception)

CLIENT TYPE (FY'22)

GENDER SPLIT (since inception)

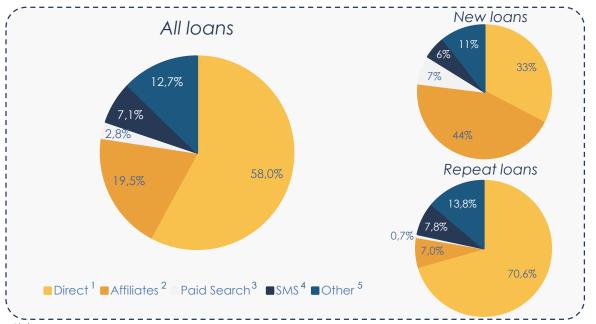

EFFICIENT AND TARGETED MARKETING

- New customers are acquired using targeted marketing and the most efficient channel – affiliates
- Emphasis is put on retaining new customers and turning them into direct repeated customers
- ❖ Accordingly, the share of customers that directly (i.e. without any commission paid to third parties) visit Sun Finance websites and take out loans reaches ~71% for repeat customers

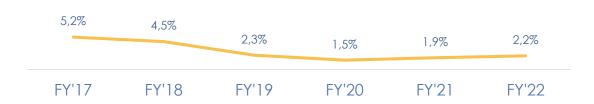

CUSTOMER ACQUISITION CHANNELS (FY'22)

- Brand recognition built over time and the strong established presence in existing markets significantly reduces overall marketing cost
- ❖ Total marketing cost over € loans originated has significantly decreased since 2017
- Unique user sessions on websites have seen continuous growth since inception

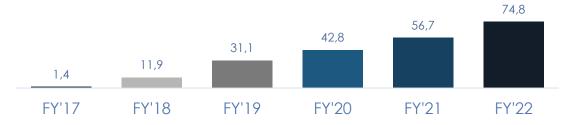

MARKETING COST PER € issued

(Marketing cost over € loans originated in the period)

PRODUCT WEBSITE TRAFFIC (Annual)

Unique user sessions (millions)

Notes:

- 1. Direct is acquisition of customers that come directly to Sun Finance product websites mainly based on brand recognition and without any commission paid to third parties
 2. Affiliates are partners that lead customers to Sun Finance on a commission basis. Wide range of channels are used based on each partners specifics and preferences
- Paid search is customer acquisition via Google search engine. Traffic is 70 / 30 split between brand key words for brand protection purposes and industry specific key words
- 4. SMS includes client onboarding and retention activities via data driven SMS sendouts
- 5. Other sources include items such as refer-a-friend programmes, cross product sales, paid social (dominated by Facebook and Instagram), email and social media messaging

DEBT COLLECTION

A comprehensive process of debt collection, depending on loan life-cycle status, ensuring leading rates of recovery across our markets while emphasizing automation where such solution is feasible, thus lowering cost base

Highly automated reminder system to reduce the number of potential delays, including robocalls

Repayment reminders are communicated using automatically generated communication tools

Focus on regular debt sale (Forward Flow) to ensure regular and predictable cash flow

Where needed also execute individual one-off debt sale deals

Strong in-house collection teams for early, middle and late collections

Detailed procedures, fully based on efficiency analysis and data driven decisions

Various payment options & continuous communication through all main channels

Both in-house and outsourced debt collection

The Group uses a wide range of well-known debt collection agencies and highly values these relationships

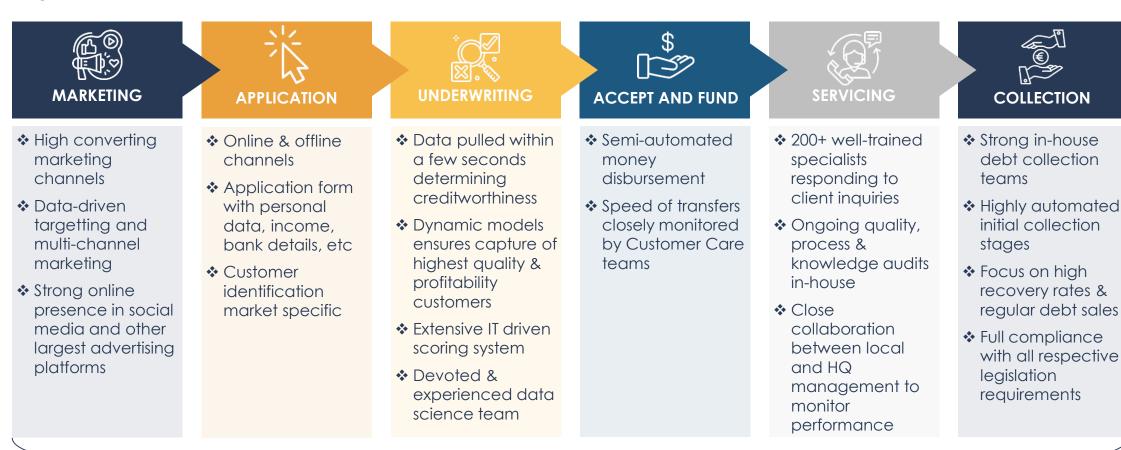

¹ Exact number of days overdue up to which inhouse debt collection is executed varies market to market

² Debt collection practices depend on jurisdiction, considering local legislation and cost efficiency considerations

OPERATIONAL EXCELLENCE THROUGH DATA DRIVEN LENDING PROCESS

Operational excellence at all steps of customer journey, from marketing to collection, enables Sun Finance to deliver market leading cost/income ratio and profitability

STREAMLINED, EFFICIENT AND LEAN OPERATIONS LEADING TO GROUP LEVEL COST/INCOME RATIO LONG-TERM TARGET AT ~20% (FY'22 RATIO 22.9%)

ALIGNED WITH ESG INVESTING: GIVING BACK TO PLANET EARTH AND SOCIETY

The goal for Sun Finance is to be a socially responsible and environmentally friendly company both in communication but also in our actions

THE SAME VALUES ARE PROMOTED TO ALL PEOPLE AT SUN FINANCE

The HQ office is a participant of the WWF Green
Office program with the aim to reduce
greenhouse gas emissions and the ecological
footprint of the workplace

Sun Finance is the founder and by far the largest supporter of Sofi Charity Foundation which focuses on animal protection, health and environmental projects

The Group has received the highest level of Carbon Footprint Standard¹ and became a Carbon Neutral company in 2021

Company's most loyal employees are encouraged to support their local communities with projects of their own initiative by giving an additional day off and providing financial support towards the project of their choosing

Sun Finance is a member of World Economic
Forum New Champions network, which unites
dynamic high-growth companies promoting
sustainable growth strategies and striving to build
a better future

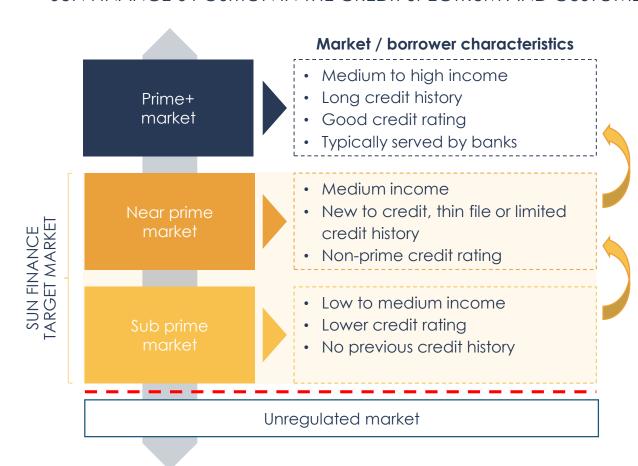

ALIGNED WITH ESG INVESTING: FULFILLING A CRITICAL SOCIAL PURPOSE

Sun Finance makes credit available to near and sub prime borrowers – those who continue to be underserved by traditional lenders. Specifically designed products for these markets fulfil an important social purpose and enable customers to move up the credit spectrum through exhibiting continued good behaviour

SUN FINANCE'S POSITION IN THE CREDIT SPECTRUM AND CUSTOMER LIFECYCLE

Sun Finance customer lifecycle -> credit build

- The credit build journey is a core proposition embedded in Sun Finance
- New Instalment Loan and Buy Now Pay Later products target higher quality customers than Microloans and Line of Credit
- They enable customers to build payment track record and move up the credit spectrum towards and eventually bridging to the prime market

PRODUCTS DESIGNED FOR CUSTOMER NEEDS

Target market customer segments...

- New to credit
- · Low/medium income
- · Self-employed
- Second chance

Near and sub prime customer segments

...inform the primary need for credit...

- A Credit education
- B Financial need / support
- Control of finances

...with products designed to fulfil needs

- Microloans
- · Line of Credit
- Instalment Loans
- Buy Now Pay Later

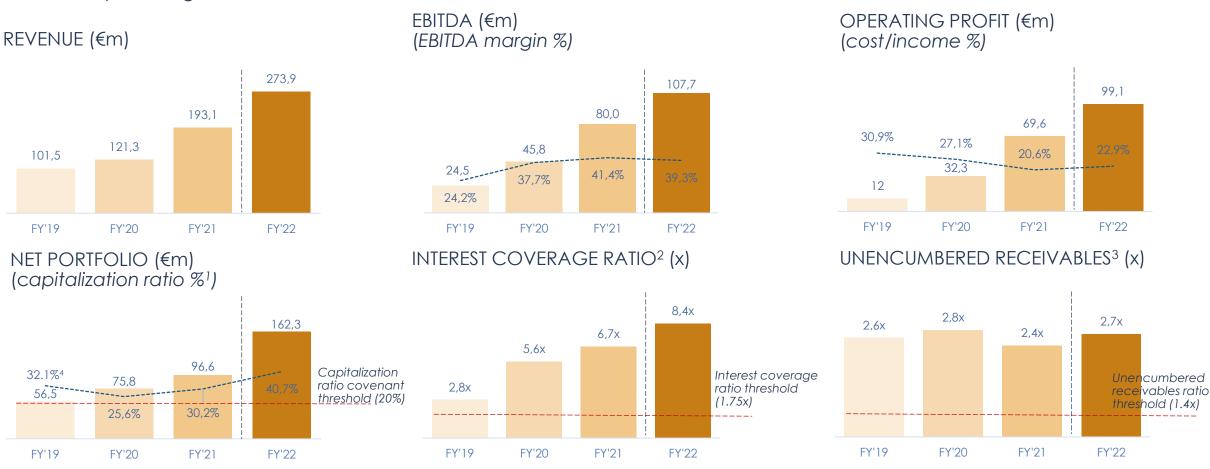

AGENDA

- 1. SUN FINANCE AT A GLANCE
- 2. BUSINESS OVERVIEW
- 3. FINANCIAL HIGHLIGHTS
- 4. TRANSACTION OVERVIEW

KEY FINANCIAL INDICATORS

The Group is continuously delivering solid financial results and growth across key metrics, including revenue and profitability, thus comfortably meeting all financial covenants

¹Capitalization ratio = Equity / Net Ioan portfolio

² Interest coverage ratio = TTM EBITDA / TTM Net financial charges

³ Unencumbered receivables = Net unencumbered loan portfolio / Total unsecured financial indebtedness

⁴ In 2019, subordinated debt has been included as part of the equity in the calculation of the metric

FUNDING PROFILE

The Group holds a diversified financing structure with a strong equity base, ensuring stability and healthy capitalisation ratio

| MAR 31, 2023 | DEC 31, 2022 | | |
|--------------|--------------|-------------------|---|

The Group's financial statements for 2019, 2020, 2021 and 2022 have been audited by Baker Tilly

- In FY'22, the Group achieved a 42% increase in Interest income, reaching €273.9m, driven by the continuous growth in loan issuance volumes and new product launches
- Despite the significant growth in volumes issued, the Group has maintained its focus on portfolio quality improvements, resulting in a lower increase rate for Net provisions compared to prior periods
- The Group maintains a strong cost discipline, ensuring a stable operating cost base
- The growth in Interest income and sustained high operational efficiency resulted in PBT of €90.7m for FY'22
- In FY'22, the Group delivered a net profit of €65.5m, being a 28% increase compared to the prior period

¹ Special purpose consolidated statements for 2019

RISK FACTORS (1)

RISKS ASSOCIATED WITH THE ISSUER, THE GROUP AND THE INDUSTRY

Macroeconomic and political risk

The Group operates in a variety of markets in Europe, Central Asia, Southeast Asia and the Americas, including Denmark, Poland, Kazakhstan, Latvia, Mexico, Sweden, Vietnam and the Philippines and is continuously analysing and considering expanding its business into other new markets when such opportunities arise and are appropriate. Some of the markets where the Group operates or plans to operate are still evolving and, thus, have higher economic and political risks.

The Group's business is dependent on consumer spending trends in the countries the Group operates. Therefore, any period of economic slowdown or recession in these countries could make it more difficult for the Group to retain or expand its customer base. High levels of unemployment in the markets in which the Group operates will likely reduce the Group's potential customer base, in turn reducing the Group's revenues. Additionally, during periods of economic slowdown or recession, the ability of the Group's customers to repay their loans could decline, leading to higher credit losses. Thus, adverse changes in economic conditions in countries where the Group operates could materially adversely affect the Group's business prospects, financial condition, and results of operations.

In recent years, some of the markets where the Group operates have undergone substantial political, economic, and social change. In addition, the tax and currency legislation in the markets in which the Group operates are subject to varying interpretations and changes, which can occur frequently. Any disruption of the reform policies and recurrence of political or governmental instability may have a material adverse effect on the Group's business, financial condition, results of operations, prospects, and cash flows.

Last year was marked by many uncertainties and volatility with high inflation rates, led by commodity, food, and logistical and production bottlenecks, as well as a reduction in GDP growth rates in most countries.

The economy in Europe shows a low pace of growth, greatly impacted by the effects of the Russian invasion of Ukraine, that affected the pace of the resumption of the post-pandemic economy, while Asia and LATAM countries couple with continued supply chain snags and soaring inflation, among other problems, causing economic pain to businesses and households. The International Monetary Fund points to a forecast of 2.8% growth for the global economy in 2023 and headline inflation is set to fall from 8.7% in 2022 to 7.0% in 2023 on the back of lower commodity prices but core inflation is likely to decline more slowly.

Further increases in interest rates may reduce aggregate demand and inflationary pressures, but may also dampen economic activity, depress jobs, and further reduce household incomes and ultimately decrease demand for the Group's products and lower its loan portfolio quality. In turn the ability to successfully collect the Group's loans may also decline with an increase in unemployment and reduction in household income. Accordingly, any decrease in demand for the Group's products and loan portfolio quality could have a significant impact on its income. If the Group fail to adapt to a significant change in customer demand for its products and services, the Group's income could decline significantly, and its ongoing business operations could be adversely affected.

Geopolitical risk

On 24 February 2022, Russia launched a military assault on Ukraine. This has led to significant volatility in the global credit markets and the global economy. Although, as of the date of the Terms of the Notes Issue, the restrictive measures imposed against Russia and Belarus have had no direct material impact on the Group, introduction of new sanctions packages and general deterioration of the economic situation, particularly as a result of significant increase of inflation potentially resulting in lower disposable incomes of the Group's customers, may affect the Group's business results and financial performance.

The political circumstances or inadequacies of the legal systems and law enforcement mechanisms in certain countries in which the Group operates may have a material negative impact on the Group's reputation, revenue, cash flows and financial condition.

The global pandemic risk

The global economy has experienced a period of elevated uncertainty since the outbreak of Covid-19, in March 2020. The global outbreak of Covid-19 pandemic, and the extraordinary health measures and restrictions on both a local and global basis imposed by authorities across the world has to some extent, and could potentially cause, disruptions in the Group's operations in the future.

While the situation with respect to the Covid-19 pandemic is quite stable at the moment, a new wave of Covid-19 or a new global pandemic cannot be ruled out, which could result in new laws and regulations that could directly, or indirectly, affect the Group's operations and cause operation disruptions, negatively affecting the Group's revenue base. Thus, the effects of a new pandemic situation could negatively affect the Group's revenue and operations going forward, where the severity of the situation in the future and the exact impacts for the Group are uncertain.

Regulatory and licensing risk

The Group's operations are subject to regulation by a variety of consumer protection, financial services, and other state authorities in various jurisdictions, including, but not limited to, laws and regulations relating to consumer loans and consumer rights protection, debt collection and personal data processing. National and international regulations, as well as plaintiff bars, the media and consumer advocacy groups, have subjected the industry Sun Finance is operating into intense scrutiny in recent years. Failure to comply with existing laws and regulations applicable to the Group's operations, or to obtain and comply with all authorizations and permits required for the Group's operations, or adverse findings of governmental inspections, may result in the imposition of material fines or penalties or more severe sanctions, including preventing the Group from continuing substantial parts of its business activities, suspension or revocation of the Group's licenses, or in criminal penalties being imposed on the Group's officers.

Regulation in the consumer credit industry is not homogeneous, but rather country specific. Among the countries where the Group's entities are currently operating, there are countries which require licensing or other type of permit for provision of consumer lending activities, and countries where the licensing is not required. For example, in Latvia where Consumer Rights Protection Centre (CRPC) carries out supervisory functions for consumer finance and licenced debt collection companies. CRPC is entitled to withdraw licenses in case there are breaches of regulations set forth by Legal Acts of the Republic of Latvia. The Group believes that the risk is managed by following regulations and recommendations. Nevertheless, the risk that the regulator may interpret or enforce existing requirements in new ways that could restrict the Group's ability to continue its current way of operation or impose significant additional compliance costs on the Group cannot be ruled out.

Furthermore, governments may seek to impose new laws, regulatory restrictions or licensing requirements that affect the products or services the Group offers, the terms on which the Group offers them, and the disclosure, compliance, and reporting obligations the Group must fulfil in connection with the Group's business. The legal and judicial systems in some of the markets where the Group operates or plans to operate in the future are less developed than those of the western European markets. Legal provisions regulating the industry in these jurisdictions have been and continue to be subject to ongoing, and at times unpredictable, changes.

The Group believes that being a larger scale company in this sector with a well-diversified portfolio and regions of operations, it is better positioned than smaller local peers to adapt to new regulation and licensing requirements. However, any of the factors listed in this section may impede the Group's ability to conduct its operations, force the Group to relocate existing operations or exit key jurisdictions and, therefore, may have a material adverse effect on its business, financial condition, results of operations, prospects, and cash flows. Sun Finance continuously follows the developments and changes in the relevant legislation in each of the markets in order to be in line with the requirements and minimize risks.

RISK FACTORS (2)

RISKS ASSOCIATED WITH THE ISSUER, THE GROUP AND THE INDUSTRY

Competition risk

The Group faces competition in all countries it operates, and in some markets the competition is more intense than others. Globally, the Group's principal competitors include other online lenders (including peer-to-peer lenders), credit card companies, consumer loan companies, such as retail chains, and banks and other financial institutions. Many banks and other financial institutions, as well as consumer loan companies that do not currently offer products or services directed towards the Group's traditional customer base, could begin doing so, or new online lending companies could enter the markets in which the Group operates or plans to enter.

The Group's competitors may operate, or begin to operate, under business models less focused on legal and regulatory compliance, which could put the Group at a competitive disadvantage. Additionally, negative perceptions of these business models could cause legislators or regulators to pursue additional industry restrictions that could affect the Group's business model. To the extent such lending models gain acceptance among consumers and investors or benefit from less onerous regulatory restrictions than those to which the Group is subject, the Group may be unable to replicate their platforms or otherwise compete with them effectively, which could cause demand for Group's products to decline substantially.

Sun Finance can offer no assurance that it will be able to compete successfully against any or all of the Group's current or future competitors. As a result, the Group could lose market share and its revenue could decline, thereby affecting the Group's ability to generate sufficient cash flow to service its indebtedness or fund operations. Significant increases in the number and size of the Group's competitors could result in a decrease in demand for its online loan products, resulting in a decline in the Group's revenues and net earnings. Increased competition or more aggressive marketing and pricing practices on the part of the Group's competitors could result in lower revenues, margins, and turnover rates in the Group's operations, which may have a material adverse effect on its business, financial condition, results of operations, prospects, and cash flows.

Credit risk

The Group is exposed to the risk of loss through defaults on the loans granted. The default is contingent on the inability or unwillingness of the customer to make payments. This includes scenarios where the customer makes payments late, only partially, or not at all. The Group's customers generally have higher frequency of delinquencies, higher risk of non-payment and, thus, higher credit losses than customers who are served by traditional providers of consumer credit.

The Group's lending decisions are based partly on information provided to the Group by loan applicants and/or delivered by third parties (credit bureaus, agencies, and other partners). Prospective customers may fraudulently provide the Group with inaccurate information, or third parties might provide the Group with incomplete information which, if not alerted, may harm the Group's credit scoring and respective risk decisions.

Any failure to correctly assess the credit risk of potential customers may have a material adverse effect on the Group's business, financial condition, results of operations, prospects and cash flows and may even invoke regulatory sanctions (including imposition of fines and penalties, suspension of operations, or revocation of the Group's licenses).

The Group operates according to its established credit risk policies and principles and uses its proprietary credit scoring system. Although the Group's credit policies and scoring models are refined and updated on an on-going basis, they may prove insufficient, which may be caused by an internal failure of the Group's risk management procedures or an external change of conditions beyond the Group's control.

The Group utilizes a variety of credit scoring criteria, monitors the performance of the Group's loan portfolio, and provides impairment for estimated losses on loan portfolio at a level estimated to be adequate to absorb expected credit losses.

Although the Group's impairment methodology is very prudent and the Group's non-performing loan portfolio coverage as at end of December 2022 is 2.6x, actual loan losses may materially exceed the level of the Group's allowance for impairment losses, which may have a material adverse effect on the Group's business, financial condition, results of operations, prospects,

and cash flows. In addition, factors beyond the Group's control, such as the impact of macroeconomic trends, political events or adverse events affecting the Group's key jurisdictions, or natural disasters, may result in an increase in non-performing loans. The Group's impairment for doubtful debts may not be adequate to cover an increase in the amount of non-performing loans or any future deterioration in the overall credit quality of the Group's total loan portfolio. If the quality of the Group's total loan portfolio deteriorates, the Group may be required to increase its impairment for loan portfolio, which may have a material adverse effect on the Group's business, financial condition, results of operations, prospects, and cash flows.

The Group ensures that appropriate risk treatment measures are adopted to address the type of risk described under this Section

Risk related to dependency upon the Group's IT systems risk

The Group's operations are significantly dependent on highly complex information technology ("IT") systems. The loan underwriting process is mainly performed automatically by the IT systems developed internally by the Group and used at various stages of the underwriting process, including customer registration, application, identification, and credit scoring. In addition, bank transfers are completed online, and reminder emails and invoicing are automatically processed and sent to customers. If any IT system at any stage of the loan underwriting process were to fail, any or all stages of the underwriting process could be affected and customer access to the Group's websites and products could be disrupted. Any disruption in the Group's IT systems would prevent customers from applying for loans or hinder the debt collection by the Group, which would impede the Group's ability to conduct its business and have a material adverse effect on its business, financial condition, results of operations, prospects, and cash flows.

In addition, the IT systems are vulnerable to a number of problems, including computer viruses, unauthorized access, physical damage to vital IT centres and software or hardware malfunctions. Any interruption in, or security breach of the Group's IT systems could have a material adverse effect on its operations, such as the ability to serve the Group's customers in a timely manner, accurately record financial data and protect the Group and its customers from financial fraud or theft. If the Group's operations are compromised, its reputation and client confidence in the Group's business may deteriorate and it may suffer significant financial losses, any of which may have a material adverse effect on the Group's business, financial condition, results of operations, prospects, and cash flows.

To address the type of risk described under this Section, the Group has adopted a set of different technical and organizational controls ensuring that the risk in question is treated in appropriate manner.

Growth and expansion risk

The Group's business may continue to grow substantially in the future. This growth has placed and may continue to place significant demands on the Group's management and its operational and financial infrastructure. Expanding the Group's products or entering into new jurisdictions with new or existing products can be costly and may require significant management time and attention. Additionally, as the Group's operations grow in size, scope and complexity and its product offerings increase, the Group will need to upgrade its systems and infrastructure to offer an increasing number of customer enhanced solutions, features and functionality. The expansion of the Group's systems and infrastructure will require the Group to commit substantial financial, operational, and technical resources in advance of an increase in the volume of business, with no assurance that the volume of business will ultimately increase. Continued growth could also strain the Group's ability to maintain reliable service levels for its customers, develop and improve the Group's operational, financial and management controls, develop and enhance its legal and compliance controls and processes, enhance reporting systems and procedures and recruit, train and retain highly skilled personnel.

Managing the Group's growth will require, among other things, continued development of financial and management controls and IT systems; increased marketing activities; hiring and training of new personnel; and the ability to adapt to changes in the markets in which the Group operates, including changes in legislation, incurrence of additional taxes, increased competition, and changes in the demand for the Group's services.

RISK FACTORS (3)

RISKS ASSOCIATED WITH THE ISSUER, THE GROUP AND THE INDUSTRY

The Group currently operates in seven jurisdictions and, as part of its business strategy, Sun Finance aims to continue pursuing attractive business opportunities in new jurisdictions including, but not limited to, Scandinavia, Europe, and Asia. Although the Group analyses and carefully plans its international expansion, such expansion increases the complexity of the Group's organization and may result in additional administrative costs (including costs relating to investments in IT), operational risk (including risks relating to management and control of cash flows and management and control of local personnel), other regulatory risks (including risks relating to non-compliance with data protection, AML/CFT, sanctions and local laws and regulations) and other challenges in managing the Group's business, including, but not limited to, cultural differences, time zone management, unusual customer behaviour.

Mistakes in planning or controlling the Group's growth and expansion in different regions may be costly and may strain its managerial and operational resources; any difficulties encountered in managing the Group's growth may have a material adverse effect on its business, financial condition, results of operations, prospects, and cash flows.

Geographical concentration risk

Several of the countries in which the Group operates generate a significant portion of its revenues. As a result, the Group is exposed to country-specific risks with respect to these national markets. In such markets, dissatisfaction with the Group's products, revocation of its operating license, a decrease in customer demand, failure to continue to expand its customer base and retain its existing customer base could have a material adverse effect on the Group's business, financial condition, results of operations, prospects, or cash flows. The Group continue to seek opportunities to expand its operations into new markets. However, there can be no assurance that such diversification efforts will be successful. The Group's business, financial condition, results of operations, prospects or cash flows could be materially adversely affected if the fails to diversify geographically and expand its operations and customer base.

Risks associated with new products and services

As part of the Group's business strategy, Sun Finance has introduced instalment loans and Buy now, Pay later (BNPL) service to its existing customer base in limited markets on a test basis and may develop and introduce other products and services that complement its current product proposition. However, the Group cannot guarantee that these products will be developed into permanent product offerings or that the Group will launch any other new products. Sun Finance can also offer no assurance that any products or services that it introduces will be successful once they are offered to the Group's current or future customers. Sun Finance may not be able to adequately anticipate its target customers' needs or desires, which could change over time rendering certain of the Group's products and services obsolete. The Group may face difficulties in making these products and services profitable and may incur significant costs in connection with such products. Moreover, the Group's introduction of additional financial products or services could subject it to additional regulation or regulatory oversight by governmental authorities. Any of these factors may have a material adverse effect on the Group's business, financial condition, results of operations, prospects, and cash flows.

Privacy and data protection breach risk

The Group's business is subject to a variety of laws and regulations that regulate user privacy issues, data protection, advertising, marketing, disclosures, distribution, electronic contracts and other communications, consumer protection and online payment services. Severity of consequences in case of non-compliance with the said privacy laws may differ from country-to-country. For instance, one of the strictest regulations is introduced by the General Data Protection Regulation ("GDPR") applicable in the European Union and European Economic Area ("EU/EEA") member states. According to the GDPR administrative fine for non-compliance with its provision may amount to 20,000,000.00 EUR or 4% from the total worldwide annual turnover of the preceding year, whichever is higher.

The introduction of new products or the expansion of the Group's activities in certain jurisdictions may subject the Group to additional obligations under privacy-related laws and regulations. In addition, the application and interpretation of these laws and regulations are often uncertain, particularly in the new and rapidly evolving fintech industry in which Sun Finance operates

and may be interpreted and applied inconsistently from country to country and may also be inconsistent with the Group's current or past policies and practices. Furthermore, the Group's operations may be affected by interpretation of the applicable laws by state and international authorities. For instance, on 16 July 2020 Court of Justice of the European Union invalidated EU-US Data Protection Shield mechanism, which affects transfer of personal data by EU/EEA companies to the US. Furthermore, the said decision clarified that before entering into Standard Contractual Clauses (another mechanism for transferring personal data outside EU/EEA), possibility to observe the provisions of the Standard Contractual Clauses in practice must be assessed. As a result, this decision affects the Group's rights to use business partners located in countries outside the EU/EEA.

In addition, some countries have adopted or are considering legislation requiring local storage and processing of data that, if enacted, would increase the cost and complexity of delivering the Group's services.

Existing and proposed laws and regulations can be costly to comply with and can delay or impede the development of new products, the expansion into new markets, result in negative publicity, increase the Group's operating costs, require significant management time and attention, and subject the Group to inquiries or investigations, claims or other remedies, including demands which may require the Group to modify or cease existing business practices and/or pay fines, penalties or other damages. This may have a material adverse effect on the Group's business, financial condition, results of operations, prospects, and cash flows.

Although the Group has adopted and continues to adopt appropriate technical and organizational measures (for instance, adopting internal documents (policies, procedures, risk assessments, etc.) regulating privacy matters, conducting trainings of employees, appointing personal data protection officers, etc.) to ensure compliance with applicable privacy laws and regulations, the Group cannot guarantee that its employees will comply at all times with such laws and regulations. If the Group's employees fail to comply with such laws and regulations in the future, the Group may become subject to fines or other penalties which may have an adverse impact on its reputation, business, financial condition, results of operations, prospects, and cash flows.

Addressing the risk in question the Group ensures that appropriate risk treatment steps are taken. For example, by appointing responsible employees, following changes and trends in the field of privacy and data protection, adopting appropriate technical and organizational measures, etc.

Anti-money laundering breach risk

Sun Finance is subject to anti-money laundering and prevention of terrorism and proliferation, sanctions laws and related compliance obligations in most of the jurisdictions in which it does business. The Group has put in place an AML/CFT and sanctions compliance policy and sophisticated internal control system, which the Group applies in all of its countries of operation. The Group has also adopted local AML/CFT and sanctions policies and procedures in all of its countries of operation. However, these policies and procedures may not prevent all possible breaches of laws. Country managers and other appointed persons in each jurisdiction are responsible for AML/CFT and sanctions compliance. The Group is required to comply with AML/CFT and sanctions compliance regulations that are generally the same restrictive as those that apply to banks. If the Group is not in compliance with relevant AML/CFT and sanctions laws, it may be subject to criminal and civil penalties and other remedial measures. Although Sun Finance invests significant resources in its AML/CFT and sanctions program, personnel and tools, any penalties, remedial measures, or investigations into any potential violations of AML/CFT and sanctions laws could harm the Group's reputation and may have a material adverse effect on its business, financial condition, results of operations, prospects, and cash flows. Further, AML/CFT and sanctions regulations may become more restrictive, which will have a material adverse effect on the Group's business, financial condition, results of operations, prospects, and

The Group is constantly improving the adopted risk treatment measures to ensure that the risk described under this Section is properly addressed at all times.

RISK FACTORS (4)

RISKS ASSOCIATED WITH THE ISSUER, THE GROUP AND THE INDUSTRY

Reputation risk

The Group's ability to attract new customers and retain existing customers depends in part on its brand recognition, reputation, and delivery of high-quality services. The Group's reputation and brand may be harmed if Sun Finance encounters difficulties in the provision of new or existing services, whether due to technical difficulties, changes to its traditional product offerings, financial difficulties, regulatory sanctions, or for any other reason. Although the Group invests significant resources in marketing and public relation services its ability to attract and retain customers is highly dependent upon the success of those campaigns and perception of the Group's reputation and brands. Restrictions on the Group's ability to advertise its products or negative perceptions or publicity regarding lending in general – even if related to seemingly isolated incidents or to practices not specific to short-term loans, such as debt collection – could erode trust and confidence in the Group and damage its reputation among existing and potential customers, which could make it difficult for Sun Finance to maintain or expand its customer base or could reduce the demand for its products and services, both of which may have a material adverse effect on the Group's business, financial condition, results of operations, prospects and cash flows.

The Group ensures that the risk in question is properly treated by the adopted risk treatment measures that are monitored and improved where necessary.

Cybersecurity risk

The Group's business involves the storage and transmission of consumers' personal data, and security breaches could expose the Group to a risk of loss or misuse of this information, litigation, and potential liability. Sun Finance is entirely dependent on the secure operation of its websites and systems, and the websites and systems of the Group's data centre providers, as well as on the general availability of the Internet. The Group has seen various phishing and malicious email threats as well as malware targeting its internal network, yet the Group has incurred no material costs from cyber-attacks or security breaches to date. A number of other companies have disclosed cyber-attacks and security breaches, some of which have involved intentional attacks. Attacks may be targeted at the Group, its customers and/or the Group's data centre providers. Although Sun Finance and its data centre providers devote resources to maintain and regularly upgrade the Group's systems and processes that are designed to protect the security of the computer systems, software, networks, data, and other technology assets as well as the confidentiality, integrity, and availability (CIA triad) of information belonging to the Group and its customers, there is no assurance that these security measures will provide absolute security. Despite the Group's efforts to ensure CIA of the systems and the Group's data centre providers' efforts to ensure the integrity of their systems, effective preventive measures against all security breaches may not be anticipated or implemented, especially because of the changing attack vectors and techniques used which may not be recognized until launched. Cyber-attacks can originate from a wide variety of sources, including third parties outside the Group, such as persons who are involved with organized crime or associated with external service providers or who may be linked to terrorist organizations or hostile foreign governments.

These risks may increase in the future as Sun Finance continues to increase its mobile and other online based product offerings and expand the Group's internal usage of web-based platforms and services (PaaS, SaaS) or expand into new countries. If an actual or perceived breach of security occurs, customer and/or supplier perception of the effectiveness of the Group's security measures could be harmed and could result in the loss of customers, suppliers, or both. Actual or anticipated attacks and risks may cause Sun Finance to incur increased costs, including costs to deploy additional personnel and protection technologies, train employees or engage third party experts and consultants.

A successful penetration or circumvention of the Group's security systems or the security system of its data centre providers could cause serious negative consequences to the Group's business, including significant disruption of its operations, misappropriation of its confidential information or that of the Group's customers or damage to the Group's computers or systems or those of the Group's customers and counterparties and could result in violations of applicable privacy and other laws, financial loss to the Group or to its customers, loss of confidence in the Group's security measures, customer dissatisfaction, significant litigation exposure and reputational harm, all of which could have a material adverse effect on the Group. In addition, most of the Group's applicants provide personal information, including bank account information when applying for consumer loans.

Sun Finance relies on encryption standards and authentication technology licensed from third parties to provide the security and authentication to effectively secure transmission of confidential information, including customer bank account and other personal information. Advances in computer capabilities, new discoveries in the field of cryptography or other developments may result in the breach or compromise of the technology used by the Group to protect transaction data. Data breaches can also occur as a result of non-technical issues.

The Group's servers are also vulnerable to computer viruses, physical or electronic break-ins, and similar disruptions, including "denial-of-service" type attacks. The Group may need to expend significant resources to protect against security breaches or to address problems caused by breaches. Security breaches that result in the unauthorized release of consumers' personal information could damage the Group's reputation and expose the Group to a risk of loss or litigation and possible liability. In addition, many of the third parties who provide products, services or support to the Group could also experience any of the cyber risks or security breaches described above, which could impact the Group's customers and the Group's business and could result in a loss of customers, suppliers, or revenue.

Any of these events could result in a loss of revenue and may have a material adverse effect on the Group's business, financial condition, results of operations, prospects, and cash flows.

To address the risk described under this Section, the Group has set up a team dedicated to cybersecurity matters and ensures continuous improvement of technical and organizational measures maintaining a level of security appropriate to the risk.

Marketing risk

The Group's acquisition marketing for new customers and its relationship management with respect to returning customers are partly dependent on search engines, such as Google, Bing, Yahool, and social media, such as Facebook and others, directing a significant amount of traffic to the Group's desktop and mobile websites via organic ranking and paid search advertising. The Group's competitors' paid search activities may result in their sites receiving higher paid search results than those of Sun Finance and/or in a substantial increase to the Group's advertising costs. The Group's paid search activities may not produce (and in the past have not always produced) desired results. Internet search engines often revise their methodologies, which could adversely affect the Group's organic rankings or paid search results, leading to a decline in the Group's ability to attract new customers or retain existing customers. Such revisions may also cause difficulties for the Group's customers in using its web and mobile sites, or result in more successful organic rankings, paid search results or tactical execution efforts for its competitors, a slowdown in the overall growth its customer base and the loss of existing customers, as well as higher costs for acquiring returning customers. In addition, search engines could implement policies that restrict the ability of consumer finance companies, such as Sun Finance, to advertise their services and products, which could reduce the likelihood of companies in the industry appearing in a prominent location in organic rankings or paid search results when certain search terms are used by the consumer. Any reduction in the number of consumers directed to the Group's web and mobile sites may have a material adverse effect on the Group's business, financial condition, results of operations, prospects, and cash flows.

Sun Finance has invested heavily in promoting its brands, including its website addresses. The Internet Corporation for Assigned Names and Numbers, the entity responsible for administering internet protocol addresses, has introduced, and has proposed the introduction of, additional new domain name suffixes in different formats, many of which may be more attractive than the formats held by the Group, and which may allow the entrance of new competitors at limited cost. It may also permit other operators to register websites with addresses similar to the Group's, causing customer confusion and the dilution of the Group's brands, which could materially adversely affect its business, prospects, results of operations and financial condition. Any defensive domain registration strategy or attempts to protect the Group's trademarks or brands may be costly and may ultimately prove unsuccessful, which may have a material adverse effect on the Group's business, financial condition, results of operations, prospects, and cash flows.

RISK FACTORS (5)

RISKS ASSOCIATED WITH THE ISSUER, THE GROUP AND THE INDUSTRY

The Group is dependent on marketing affiliates as a source for new customers. Its marketing affiliates place the Group's advertisements on their websites, which, in turn, direct potential customers to the Group's websites. As a result, the success of the Group's business depends substantially on the willingness and ability of marketing affiliates to provide Sun Finance with customer leads at acceptable prices.

A failure of the Group's marketing affiliates to comply with applicable laws and regulations, or any changes in laws and regulations applicable to marketing affiliates or changes in the interpretation or implementation of such laws and regulations, could have an adverse effect on its business and could increase negative perceptions of the Group's business and industry. Also, certain changes in the Group's online marketing affiliates' internal policies or privacy rules could limit the Group's ability to advertise online. Additionally, the use of marketing affiliates could subject Sun Finance to additional regulatory cost and expense. Any restriction on the Group's ability to use marketing affiliates may have a material adverse effect on its business, financial condition, results of operations, prospects, and cash flows.

Counterparty risk

Sun Finance advances loans to customers and collect repayments from customers through local bank accounts and/or payment providers. The Group's continuing relationships with the banks and payment providers with which Sun Finance maintains accounts or may establish accounts in the future are critical to the Group's business.

The Group contacts consumer credit agencies and uses other publicly available data sources in the jurisdictions in which it operates to verify the identity and creditworthiness of potential customers. In addition, every loan application in every country is verified through one or more credit bureaus. If access to such information is restricted or disrupted for any period of time, or if the cost of such information significantly increases, the Group may not be able to complete automatic customer identity and credit scoring checks in a timely manner or at all. This could impede its ability to process applications and issue loans and/or increase the cost of operation.

Sun Finance also outsources certain IT services, such as data centre and technical support, to third-party providers.

Moreover, the Group generally outsources the collection of debt that is overdue by more than 90 days to debt collection agencies in the jurisdictions in which it operates, or the Group arranges forward flows with respective agencies. The loss of a key debt-collection agency relationship, or the financial failure of one of the Group's core debt-collection agency partners, could restrict its ability to recover delinquent debt, and there is no guarantee that Sun Finance could replace a strategic debt collection agency partner in a timely manner or on favourable terms.

Any inability to maintain existing business relationships with banks, local consumer credit agencies, IT service providers, debt-collection agencies and other third-party providers or the failure by these third-party providers to maintain the quality of their services or otherwise provide their services to the Group may have a material adverse effect on the Group's business, financial condition, results of operations, prospects, and cash flows.

Liquidity risk

The Group is exposed to liquidity risks arising out of the mismatches between the maturities of its assets and liabilities, which may prevent Sun Finance from meeting its obligations in a timely manner. While such mismatch is well managed as significant proportion of the Group's assets has short-term maturity whereas part of its liabilities is long-term, the Group's growth depends, to a significant extent, on its ability to obtain adequate funding from a variety of sources, such as the international capital markets, bank facilities and international online peer-to-peer platforms and marketplaces (which is currently one of the main the Group's funding sources). It is possible that these sources of financing may not be available in the future to the extent the Group requires, or they may be prohibitively expensive and/or contain overly onerous terms. European and international credit markets have experienced, and may continue to experience, high volatility and severe liquidity disruptions, such as those that took place following the international financial and economic crisis in 2008-09 and, more recently, the Russia's invasion of Ukraine.

These and other related events have had a significant impact on the global financial system and capital markets and may make it increasingly expensive for Sun Finance to diversify its funding sources, raise additional funds and refinance its debt if necessary.

The Group's working capital requirements can vary significantly from market to market, depending, in part, on differences in demand for consumer credit. If available cash flows from operations are not sufficient to fund the Group's on-going cash needs, it would need to use the Group's cash balances and/or available credit facilities, as well as other funding sources to satisfy those needs. Furthermore, an economic or industry downturn, such as the financial and economic downturn in 2008-2009, could increase the level of non-performing loans. A significant deterioration in the Group's debt collection could affect the Group's cash flow and working capital position and could also negatively impact the cost or availability of financing to the Group. If the Group's capital resources are insufficient to meet its capital requirements, it will have to raise additional funds.

Sun Finance may not be able to raise sufficient additional funds on favourable terms or at all. If the Group fails to raise sufficient funds, its ability to fund operations, take advantage of strategic opportunities or otherwise respond to competitive pressures could be significantly limited, which may have a material adverse effect on the Group's business, financial condition, results of operations, prospects, and cash flows.

Loan marketplace risk

To sustain its growth the Group needs access to diversified and efficient funding sources. Subsidiaries previously have and may also in the future finance their operations through Loan Marketplace platforms. As at the date of issue Sun Finance cooperates with one of the largest European marketplace platforms – Mintos.

The funding the Group attracts on Loan Marketplace mostly is short-term with maturities before the Notes. In case the quality of the loans that are financed through Loan Marketplace issued by any of the Subsidiaries significantly deteriorates and / or the Subsidiary faces physical restrictions on receiving the cash flows from loans issued (such as e.g., during the first wave of COVID-19), the Group may be required to use its cash flows to cover its liabilities towards Mintos before the Notes, which could leave an adverse effect on the Group's ability to meet its obligations under the Notes.

Additionally, if investor sentiment on the Loan Marketplace deteriorates, the Group may fail to raise sufficient funds or the cost of funding may increase, which could leave a negative impact on the Group's ability to implement its growth strategy.

Interest rate risk

The Group earns a substantial majority of its revenues from interest payments on the loans issued to customers. Financial institutions, peer-to-peer and marketplace platforms, and other funding sources provide the Group with the capital to fund these loans and lines of credit and charge interest on funds that the Group draws down. In the event that the spread between the rate at which the Group lends to its customers and the rate at which it borrows from its lenders decreases, its financial results and operating performance will suffer. The interest rates Sun Finance charges to its customers and pays to its lenders could each be affected by a variety of factors, including access to capital based on the Group's business performance, the volume of loans the Group issues to its customers, competition, and regulatory requirements. The interest rates may also be affected by the change in the mix of the types of products the Group sells to its customers and investors. Interest rate changes may adversely affect the Group's business forecasts and expectations and are highly sensitive to many macroeconomic factors beyond the Group's control, such as inflation, the level of economic growth, the state of the credit markets, changes in which the Group operates. Any material reduction in the Group's interest rate spread could have a material adverse effect on the Group's business, financial condition, results of operations, prospects, and cash flows.

RISK FACTORS (6)

RISKS ASSOCIATED WITH THE ISSUER, THE GROUP AND THE INDUSTRY

Key employee risk

The Group's success depends on its management team and employees who possess highly specialized knowledge and experience in product and business development, IT, risks, and finance. Many members of the Group's senior management team possess significant experience in the consumer lending industry and knowledge of the regulatory and legal environments in the markets in which it operates, and the Group believes that its senior management would be difficult to replace. The market for qualified individuals is highly competitive and labour costs for the hiring and training of new employees are increasing. Accordingly, Sun Finance may not be able to attract and/or retain qualified executive officers or IT specialists, which may have a material adverse effect on its business, financial condition, results of operations, prospects, and cash flows.

Foreign exchange risk

Sun Finance operates in various jurisdictions and provides loans in local currencies, while significant part of the Group's loans and borrowings is denominated in euro. While the Group takes all possible measures to minimize foreign exchange risks, including careful monitoring and pricing of currency risk in the Group's products and search for natural hedges and available hedging instruments, adverse foreign exchange fluctuations against the euro, the Group's reporting currency, in the Danish Zloty, the Mexican Peso, the Kazakhstani Tenge, the Swedish Krona, the Vietnamese Dong and the Philippine peso could have a material negative effect on the Group's business, financial condition, and results of operations. Additionally, Sun Finance may be exposed to new currencies as a consequence of further geographic expansion.

Litigation risk

The Group may be adversely affected by contractual claims, complaints, and litigation, resulting from relationships with counterparties, customers, competitors, or regulatory authorities, as well as by any adverse publicity that the Group may attract. Any such litigation, complaints, contractual claims, or adverse publicity may have a material adverse effect on the Group's business, financial condition, results of operations, prospects, and cash flows. Defence of any lawsuit, even if successful, could require substantial time and attention of the Group's management and could require the expenditure of significant amounts for legal fees and other related costs. Sun Finance is also subject to a risk of regulatory proceedings and regulatory proceedings in the interpretation of applicable laws, rules, and regulations in regulatory proceedings, including regulatory proceedings in which the Group is not a party. Any of these events could have a material adverse effect on the Group's business, financial condition, results of operations, prospects, and cash flows.

Risk of natural disasters and other business disruption

The Group's services and operations are vulnerable to damage or interruption from tornadoes, earthquakes, fires, floods, power losses, telecommunication failures, terrorist attacks, acts of war, human errors and similar events. A significant natural disaster, such as a tornado, earthquake, fire, or flood, could have a material adverse impact on the Group's ability to conduct business, and its insurance coverage may be insufficient to compensate for losses that may occur. Although Sun Finance has implemented business continuity plans, acts of terrorism, war, civil unrest, violence, or human error could cause disruptions to the Group's business or the economy as a whole. Any of these events could cause consumer confidence to decrease, which could decrease the number of loans issued to customers. Any of these occurrences may have a material adverse effect on the Group's business, financial condition, results of operations, prospects, and cash flows.

Taxation risk

The Group operates in various countries with diverse sets of tax regimes. Changes to local tax regimes or challenges to the current tax structures of the Group's business could have material adverse effect on its business, financial condition, or results of operations. Additionally, certain tax positions taken by the Group require the judgement of management and, thus, could turn to be inefficient or challenged by tax authorities due to possible erroneous interpretation of tax legislation.

RISK FACTORS (7)

RISKS ASSOCIATED WITH THE NOTES

Notes repayment risk

At maturity, the entire principal amount of the Notes, together with accrued and unpaid interest, will become due and payable. The Group may not have the ability to repay or refinance these obligations. If the Maturity Date occurs at a time when other arrangements prohibit the Group from repaying the Notes, it could try to obtain waivers of such prohibitions from the lenders and holders under those arrangements, or the Group could attempt to refinance the borrowings that contain the restrictions. If the Group fails to obtain the waivers or refinance these borrowings, it would be unable to repay the Notes.

Subordination risk

The Notes and the related guarantees will not be secured. The Notes will rank pari passu with other senior unsecured liabilities of the Issuer. In case of insolvency, the Investors have equal rights for satisfaction of their claims with other creditors ranking in the same claims' group according to the relevant Legal Acts, after the satisfaction of all claims of all secured creditors of the Issuer. The guarantees will be effectively subordinated to any secured indebtedness of the respective Guarantor, to the extent of the value of the collateral securing such indebtedness, incurred in the future by the Guarantors. The effect of this subordination is that upon a default in payment on, or the acceleration of, any of the Issuer's or any Guarantor's secured indebtedness or in the event of a bankruptcy, insolvency, liquidation, dissolution, reorganization or similar proceeding involving the Issuer or any of the Guarantors, the proceeds from the sale of assets securing the Issuer's or any Guarantor's secured indebtedness will be available to pay obligations on the Notes or Guarantees, as applicable, only after all of the Issuer's or any Guarantor's secured indebtedness has been paid in full.

As of 31 December 2022, the Group had outstanding liabilities towards Loan Marketplace (Mintos) in the amount of EUR 21.1 million. Due to specifics of national legislation, in some of the countries the Group operates in (Latvia and Kazakhstan), loans of the borrowers are not directly listed on the Mintos platform. In these countries Mintos acts as an intermediary, granting loans to the relevant Subsidiaries of the Group, and these loans are secured by commercial pledge agreements. In addition, in some countries the Group provides a Group guarantee for the loan portfolio listed on the platform by the specific loan originator in the country.

The Issuer has two senior unsecured notes issues: EUR 20,000,000 (ISIN:LV0000802494) notes issue maturing on 30 June 2024 and EUR 50,000,000 (ISIN:LV0000860112) notes issue maturing on 30 September 2025. LV0000802494 notes have 11% annual coupon rate, paid quarterly, and LV0000860112 notes have 11% + 3M EURIBOR annual coupon rate, paid monthly. These notes will rank pari passu with Notes, which the Issuer plans to issue according to these Terms of Notes Issue. The Maturity Date of LV0000802494 and LV0000860112 notes is before Maturity Date of the Notes, thus inability to repay or refinance these obligations might result in an event of default on the Notes. Additionally, as of 31 December 2022, the Issuer had other unsecured Financial Indebtedness that ranks pari-passu with the Notes in the amount of EUR 20.8 million and Subordinated Debt in the amount of EUR 30.5 million (including EUR 16.1 million subordinated bonds redeemed at the maturity on 28 February 2023).

Guarantee enforceability risk

Each Guarantee provides the holders of the Notes with a direct claim against the relevant Guarantor. However, each Guarantee will be limited to the maximum amount that can be guaranteed by the relevant Guarantor without rendering the relevant Guarantee voidable or otherwise ineffective under applicable law, and enforcement of each Guarantee would be subject to certain generally available defences. Enforcement of any of the Guarantees against any Guarantor will be subject to certain defences available to Guarantors in the relevant jurisdiction. Although laws differ among these jurisdictions, these laws and defences generally include those that relate to corporate purpose or benefit, fraudulent conveyance or transfer, voidable preference, insolvency or bankruptcy challenges, financial assistance, preservation of share capital, thin capitalization, capital maintenance or similar laws, regulations or defences affecting the rights of creditors generally. If one or more of these laws and defences are applicable, a Guarantor may have no liability or decreased liability under its Guarantee depending on the amounts of its other obligations and applicable law.

There is a possibility that the entire Guarantee may be set aside, in which case the entire liability may be extinguished. If a court decided that a Guarantee was a preference, fraudulent transfer or conveyance and voids such Guarantee, or holds it unenforceable for any other reason, the investor may cease to have any claim in respect of the relevant Guarantor and would be a creditor solely of the Issuer and, if applicable, of any other Guarantor under the relevant Guarantee which has not been declared void or held unenforceable.

The Notes will be guaranteed by the initial and any additional Guarantors, which are organized or incorporated under the laws of multiple jurisdictions. In the event of a bankruptcy, insolvency or similar event of a Guarantor, bankruptcy, insolvency, or similar proceedings could be initiated against that Guarantor in any of the relevant jurisdictions. The rights of holders of the Notes under the Guarantees will thus be subject to the laws of a number of jurisdictions, and it may be difficult to enforce such rights in multiple bankruptcy, insolvency and other similar proceedings. Moreover, such multi-jurisdictional proceedings are typically complex and costly for the creditors. In addition, the bankruptcy, insolvency, administration, and other laws of the jurisdiction of organization of the Issuer or the Guarantors may be materially different from, or in conflict with, one another, including in relation to the creditor's rights, the priority of creditors, the ability to obtain post-petition interest and the duration of the insolvency proceeding. The application of these various laws in multiple jurisdictions could trigger disputes over laws of which jurisdiction(s) should apply and could adversely affect the ability to realize any recovery under the Notes and the Guarantees.

No limitation on issuing additional debt

The Issuer and the Group are not prohibited from issuing further debt. If the Issuer or the Group incurs significant additional debt of an equivalent seniority with the Notes, it will increase the number of claims that would be equally entitled to receive the proceeds, including those related to the Issuer's possible insolvency. Further, any provision which confers, purports to confer, or waives a right to create security interest in favour of third parties, such as a negative pledge, is ineffective against third parties since: (i) it is an issue of a contractual arrangement only being binding upon the parties to such contractual arrangement; (ii) there is no specific legislation in Latvia and Malta providing beneficiaries of negative pledge undertakings or covenants with a preferred position vis-a-vis the claims of third parties; and (iii) no registry or public record exists in Latvia and Malta through which negative pledge undertakings or covenants could be filed to obtain a preferred position. Should the Company breach its obligations under such undertakings and covenants and create a security interest in favour of a third party, such third party would obtain a valid and enforceable security interest over the pledged asset.

Liquidity risk

Neither the Issuer nor any other person guarantees the minimum liquidity of the Notes. Thus, the Noteholders should take into account that they may not be able to sell or face difficulties in selling their Notes in secondary market at their fair market value or at all.

Delisting risk

After Notes registration the Issuer plans to request admission to trading of the Notes on the Multilateral Trading Facility (MTF) First North operated by Nasdaq Riga. There is a risk that Nasdaq Riga would not accept the Notes to be admitted to trading on First North or order to delist the Notes from the First North before the maturity after the admission to trading has taken place due to changes in Legal Acts, including Nasdaq Riga regulations, or recommendations by the Financial and Capital Market Commission of Latvia.

Price risk

The development of market prices of the Notes depends on various factors, such as changes of interest rates, central bank policies, overall economic development, or demand for the Notes.

The Notes bear a fixed interest rate. Thus, the Noteholders who seek to sell the Notes before their final maturity are exposed to interest rate risk: If the market interest rate increases, the price of fixed rate Notes typically declines.

RISK FACTORS (8)

RISKS ASSOCIATED WITH THE NOTES

Neither the Issuer, nor any other person undertakes to maintain a certain price level of the Notes. The Noteholders are, thus, exposed to the risk of an unfavourable price development of their Notes if they sell the Notes prior to the final maturity. If a Noteholder decides to hold the Notes until maturity, the Notes will be redeemed at their Nominal Value.

Foreign exchange risk

he Notes will be denominated and payable in EUR. If investors measure their investment returns by reference to a currency other than EUR, an investment in the Notes will entail foreign exchange-related risks as the value of EUR relative to their reference currency may significantly fluctuate due to economic, political, and other factors over which the Group has no control. Depreciation of the EUR against the reference currency could lower the effective yield of the relevant Notes below their stated coupon rate and could result in a loss to investors when the return on such Notes is translated into the reference currency.

Repurchase or redemption risk

The Group may seek to repurchase or redeem a portion of the Notes from time to time, especially when prevailing interest rates are lower than the rate borne by such Notes. If prevailing rates are lower at the time of redemption, the investor may not be able to reinvest the redemption proceeds in a comparable security at an effective interest rate as high as the interest rate on such Notes being redeemed. The Group's redemption right also may adversely impact investor's ability to sell such Notes. The Group may from time to time repurchase the Notes in the open market, privately negotiated transactions, tender offers or otherwise. Any such repurchases or redemptions and the timing and amount thereof would depend on prevailing market conditions, liquidity requirements, contractual restrictions, and other factors. Such transactions could impact the market for such Notes and negatively affect the Notes' liquidity.

Tax risk

Tax rates and tax payment procedure applicable at the moment of purchase of the Notes to the tax residents, non-residents of Malta, and residents of other countries may change. The Issuer will not compensate the Noteholders for any increases in taxes. Therefore, the Noteholders may receive smaller payments related to the Notes. At the time of signing these Terms of the Issue, Maltese laws do not impose on the Issuer tax withholding obligation for payments made to Noteholders non-residents of Malta in relation to the Notes. In case a Noteholder (corporate or non-corporate) qualifies as being a tax resident of Malta during the year in which the investment income (interest) is derived, the interest payable in respect to the Note shall be subject to the final withholding tax, currently at the rate of 15%, unless the Issuer is instructed by the resident Noteholder at the time of subscription to receive interest gross of any withholding tax. For more detailed information you are advised to seek advice on the taxation of such an income as specific rules may apply.

Resolution of Noteholders risk

The resolution of the Majority Noteholders is binding on all Noteholders. Thus, a Noteholder is subject to the risk of being outvoted by a majority resolution of the other Noteholders. As such, certain rights of such Noteholder against the Issuer may be amended or reduced, or even cancelled, without its consent.

Risk that some Noteholders might have more preferential terms than others

While the Issuer will try to maintain the proportional reduction principle to the extent possible in final allocation of the Notes, in case the total number of Notes subscribed for is higher than the number of Notes available, the Issuer has a right to refuse all or part of the subscribed Notes to any Potential Investor due to perceived risks that might not be directly measurable and subjective, thus, the proportionality principle might not be observed.

Additionally, the Issuer has the right to sell the Notes at a price lower than their Nominal value to selected Noteholders and/or enter into agreements that may add additional rights to selected Noteholders if the Issuer perceives them as especially important for this Notes issue due to the size of their investment or added experience. This may result in a situation where some Noteholders might gain preferential terms for investment into the Notes than the rest of the Noteholders.

Risks associated with colletaral agent agreement

The Investors are represented by the Collateral Agent in all matters relating to the Guarantee. There is a risk that the Collateral Agent, or anyone appointed by it, or replacing it, does not properly fulfil its obligations in terms of enforcing or taking other necessary actions in relation to the Guarantee. Subject to the terms of the Collateral Agent Agreement, the Collateral Agent is entitled to enter into agreements for the use of services of a third-party and appoint third-party representatives in the course of performance of its tasks and acts as stipulated in these Terms of the Notes Issue or take any other actions necessary for the purpose of enforcing the Guarantee or for the purpose of settling, among others, the Investors rights to the Guarantee.

The Guarantee will be subject to certain limitation on enforcement and may be limited by the applicable law or subject to certain defences that may limit its validity and enforceability.

The Guarantee provides the Collateral Agent, acting for the benefit of the Noteholders, with a claim against the relevant Guarantor. However, the Guarantee will be limited to the maximum amount that can be guaranteed by the relevant Guarantor without rendering the Guarantee voidable or otherwise ineffective under the applicable law, and enforcement of the Guarantee would be subject to certain generally available defences.

Enforcement of the Guarantee against any Guarantor will be subject to certain defences available to the Guarantors in the relevant jurisdiction. Although, laws differ among jurisdictions, laws and defences generally include those that relate to corporate purpose or benefit, fraudulent conveyance or transfer, voidable preference, insolvency or bankruptcy challenges, financial assistance, preservation of share capital, thin capitalization, capital maintenance or similar laws, regulations or defences affecting the rights of creditors generally. If one or more of these laws and defences are applicable, the Guarantors may have no liability or decreased liability under the Guarantee depending on the amounts of its other obligations and applicable law.

There is a possibility the entire Guarantee may be set aside; in which case the entire liability may be extinguished. If a court decides that the Guarantee was a preference, fraudulent transfer or conveyance and voids the Guarantee, or holds it unenforceable for any other reason, the Noteholders may cease to have any claim in respect of the relevant Guarantor and would be a creditor solely of the Issuer and, if applicable, of any other Guarantor.

The Notes will be guaranteed by the Guarantors, which are organised or incorporated under the laws of relevant jurisdiction. In the event of a bankruptcy, insolvency or similar event of a Guarantor, bankruptcy, insolvency, or similar proceedings could be initiated against that Guarantor in any of the relevant jurisdictions. The rights of Noteholders under the Guarantee will thus be subject to the laws of a number of jurisdictions, and it may be difficult to enforce such rights in several bankruptcy, insolvency and other similar proceedings.

Moreover, such multi-jurisdictional proceedings are typically complex and costly for the creditors. In addition, the bankruptcy, insolvency, administration, and other laws of the jurisdiction of organization of the Issuer and the Guarantors may be materially different from, or in conflict with, one another, including in relation to the creditor's rights, the priority of creditors, the ability to obtain post-petition interest and the duration of the insolvency proceeding. The application of these various laws in multiple jurisdictions could trigger disputes over laws of which jurisdiction(s) should apply and could adversely affect the ability to realise any recovery under the Notes and the Guarantee.

The enforcement of the Guarantee will be subject to the procedures and limitations set out in the Collateral Agent Agreement and these Terms of the Notes Issue.

Even when the Guarantee is enforceable, the enforcement is subject to the procedures and limitations agreed in the Collateral Agent Agreement and these Terms of the Notes Issue. There can be no assurances as to the ability of the Investors to instruct the Collateral Agent to initiate any enforcement procedures. Furthermore, any enforcement of the Guarantee may be delayed due to the provisions of the Collateral Agent Agreement and these Terms of the Notes Issue. The rights of the Investors depend on the Collateral Agent's actions and financial standing.

RISK FACTORS (9)

RISKS ASSOCIATED WITH THE NOTES

By subscribing for, or accepting the assignment of, any Note, each of the Investors will accept the appointment of the Collateral Agent as the agent and representative of the Investors, to represent and act for the Investors in relation to the Guarantee. Only the Collateral Agent is entitled to exercise the rights under the Guarantee and enforce the same. Any failure by the Collateral Agent to perform its duties and obligations properly, or at all, may adversely affect the enforcement of the rights of the Investors due to, for example, inability to enforce the Guarantee and/or receive any or all amounts payable from the Guarantee in a timely and effective manner.

Under the Collateral Agent Agreement, the Majority Noteholders may pass a decision to replace the Collateral Agent at any time. At any time, the Collateral Agent may resign from its role as the Collateral Agent with 1 (one) month notice. Furthermore, the Collateral Agent's liability to the Noteholders and the Guarantors is limited in accordance with Clause 3.2.20.10. and 3.2.20.11. As of the date of the Terms of the Notes issue the Collateral Agent's professional liability is insured with an insurance company "Compensa Vienna Insurance Group" ADB Latvijas filiāle (registration number: 40103942087).
